Dr. George Sanchez
Sutton Hall
The University of Texas
Austin, Texas

Dear Dr. Sanchez:

It took longer than I thought it would to complete this report. I have tried to make it as comprehensive as possible so that we may see any improvement that has occurred.

I believe these scores are valid except the second grade at Dogan, Dunbar and Park, and the sixth grade at Dogan Schools. We found out that there was coaching of pupils for tests at Dogan and Dunbar and circumstantial evidence caused us to assume the same for Park-second grade.

Disregarding the second grades where coaching was practiced, we can see definite improvement. Rock Hill School suffered a change of teachers twice during the year and Five Notch was changed three times during the year. I believe this accounts for the pathetic situation out there.

We hope you are going to work with us during the next school year. I am trying to think of some form of In-service Education that could be initiated by the teacher group with your help and other consultants we may be able to get. If you have time to think about the matter, please give me some suggestions.

Very truly yours,

Irene B. Campbell
